## SUMMARY

Front-End Developer with 14 years experience in web development. Proficient in JavaScript and ReactJS, with intermediate skills in NextJS and TypeScript. Experience in team leadership and collaboration, with addition of numerous individually completed projects. Efficient project management skills to deliver on time and achieve client satisfaction.

## EXPERIENCE

### Front-End Developer

Australia Southworld Media

Aug 2016 - Feb 2024 Sydney, NSW

Responsible for frontend design and development for media related web application

- Developed a web app that promotes upcoming events using JavaScript, PHP and MySQL
- Later migrated the events app to ReactJS
- Developed a web app that collects articles published on the employer's Wechat Official Account (Chinese social media platform) and provides additional search and categorize functions
- Developed websites for employer and partnering companies and organisations, utilising different frameworks and platform according to the clients' needs.

### Business Support Technician

Thales Australia

Mar 2010 - Jul 2016 Sydney, NSW

Responsible for a data repository system used across departments based on SharePoint

- Led team to develop a SharePoint based data repository system that replaced the existing work process for data collection
- Regular maintenance and updates as more departments were brought into the system
- Developed web flows to integrate reporting across departments and automate work processes within different departments
- Utilized Javascript to extend functionalities such as data visualization

### Webmaster

University of Sydney Table Tennis Club

Mar 2010 - Dec 2012 Sydney, NSW

Responsible for design and maintenance for the club website

- Built the club website from scratch using HTML and CSS
- Later migrated the website to Wordpress
